MK-SAFE

Sealing ring for water meters

Application

Mätarkontroll's MK-SAFE plastic sealing ring for hot and cold water meters is fitted over the lock nut of the meter coupling and prevents the meter from being removed without it being visible. The ring snaps together easily and can only be opened by destroying it.

The sealing ring has a unique serial number that can be used to document where the ring is fitted. It is also available for sealing gas meters and withstands temperatures up to 90 °C.

Features and benefits

- Prevents meter removal without a visible break
- Snaps together, can only be opened by destroying it
- Unique serial number for documentation
- Also for gas meters, withstands up to 90 °C

Technical specification

Material	Plastic
Fits	Cold, hot water and gas meters
Sizes	MK-SAFE15 (DN15, G20), MK-SAFE20 (DN20, G25), MK-SAFE25 (DN25, G32), MK-SAFE40 (DN40, G50)
Temperature	Up to 90 °C
Marking	Unique serial number
